

# 2022 ENVIRONMENTAL STATEMENT CEPESA CHEMICAL PUENTE MAYORGA

In 2022, Cepsa Chemical Puente Mayorga's environmental investments totaled more than **5 million euros**, including the completion of the **DETAL** project, the use of **more efficient catalysts** for processes and **decarbonization projects**.

## Leadership

We are world leaders in the production of LAB (**linear alkylbenzene**) thanks to our technological leadership.

## Launch of NextLAB

Family of sustainable products produced with **renewable and circular raw materials**.

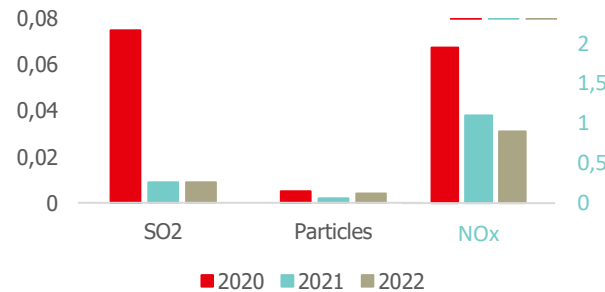

nextLAB

## Atmospheric emissions

Atmospheric emissions from the combustion sources at the facility are controlled by **monitoring, self-monitoring, and external measurements**.

Atmospheric emissions (ton/10 kton produced)

## Renewable energy

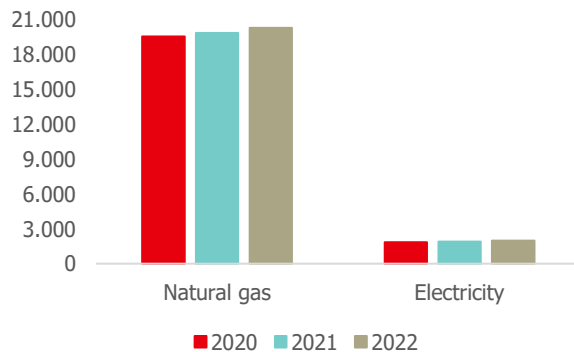

100% of CQPM's electricity consumption is **green electricity guaranteed to be renewably sourced**.

## Wastewater

Wastewater from **Cepsa Chemical Puente Mayorga** are sent to San Roque Energy Park for **treatment**.

Energy efficiency (GJ/10 kton produced)

## Energy efficiency

Thanks to the implementation of the **Energy Management System** and the Company's policy of continuous improvement, the Company continues to improve year after year in **enhancing the energy efficiency** of its facilities.

Water discharged (m3)
